PCC Mission Moment

In Guatemala, PWS&D supports a project through our local partner, AMMID, to implement rainwater harvesting tanks as a sustainable and efficient solution to water shortages in rural communities. "In my community, we have had problems with our drinking water for two years," shares Catalina Pérez Aguilón. "As women, we have to carry water and travel 25 minutes to the river to wash, which is physically exhausting. But today I feel happy because of the water tanks; our family will have safe water for our consumption, irrigation for our family garden, and personal hygiene at home. Water is life; without water, we will all perish, so it is important to take care of water to ensure the future of the next generations."
